STRONG

SFERA^{ROBUR}

INNOVATIONS
ARE NOT ONLY IN THE
DETAILS

SFERA^{NEW}

**Modern look suitable for all types of homes.
High perception of quality and sturdiness across the whole range.**

- Stunning design
- Perfect alignment of the modules
- Same colour variations also for the rainshields
- Lowered wall mounted boxes available in the same colour variations

Protrusion from the wall 15 mm only

ALLMETAL

SFERA^{ROBUR}

Extra strong front section and frame for increased safety. Flush mounted box (optional) in steel, to prevent the device being pulled off.

- Minimum protrusion from the wall
- Reinforced plastic components
- Compatible with SFERA New rainshields and wall mounted boxes

Protrusion from the wall 20.5 mm only

TWO SOLUTIONS
ONE SINGLE ELECTRONIC
HEART

MODULAR COMPOSITION OF THE FUNCTIONS

SEPARATE COMPOSITION OF THE FINISHES

AN ADVANTAGE FOR EVERYONE

A flexible system

- The same electronic module may be used for both the "New" version and the "Robur" version
- Just a few codes to make warehouse storage and the job of the installer simpler.
- A wide range of audio and video functions with only 13 electronic modules.

UNLIMITED
COMBINATIONS
FOR EACH INSTALLATION
REQUIREMENT

13 function modules unlimited combinations

A COMPACT AND COMPLETE RANGE OF ELECTRONIC MODULES

TRADITIONAL FUNCTIONS

- Basic audio
- Audio
- Audio video
- Pushbuttons
- Display

SPECIALIST FUNCTIONS

- Wide angle Audio video
- Night & Day camera and wide angle
- Inductive loop and control speech synthesis

To guarantee maximum audio and video performance, and minimize installation and connection times, SFERA uses the 2 WIRE technology.

2 WIRE TECHNOLOGY FOR MAXIMUM PERFORMANCE

The 2 wire technology gives the possibility of turning an audio system into a colour video system without need for modifications on the system structure

QUALITY AND STURDINESS

The innovative design is the guarantee of a product **CAPABLE OF DOING EVERYTHING.**

- Protection index against dust and water sprays IP54
- Protection index against mechanical impact up to IK10
- High protection from UV rays and saline mists

ADVANCED VIDEO FUNCTIONS

■ NIGHT & DAY

Perfect and clear images also in low light conditions thanks to the IR LEDs and the automatically removable IR filter.

■ WIDE ANGLE CAMERA

Wide horizontal and vertical shooting range. Better protection against vandals and possibility of use by children and disabled people.

SAFETY AND SIMPLICITY AT THE SERVICE OF THE RESIDENT

SFERA offers specific specialist solutions that enrich the wide offer of functions available to the professional, and are easy to use by the end user.

DOOR LOCK RELEASE FUNCTIONS

■ KEYPAD

■ BADGE READER

■ FINGERPRINT READER

Advanced devices, perfectly integrated in terms of look with the SFERA pushbutton panels, but which can also be used in stand alone systems. Simplified management of activations, programming of residents directly on the device, without need for removal, or to use accessory programming aids.

MAXIMUM ERGONOMICS

■ CALL FORWARDED

■ SYSTEM BUSY

Call forwarded

Door lock open

Communication active

INDUCTIVE LOOP AND CONTROL SPEECH SYNTHESIS

Use by people wearing hearing aids, with the selector in the T position

Use by blind people thanks to the control speech synthesis module

WIDE ANGLE CAMERA

Wide field of view
Horizontal: 135°
Vertical: 96°

Use by children and disabled people

Meeting all needs
SFERA is well suited to all
installation solutions

Horizontal configuration
SFERA NEW

Vertical configuration
SFERA NEW

PERFECT
COMPOSITION AND
MAXIMUM **FLEXIBILITY**

**Horizontal configuration
SFERA ROBUR**

**Vertical configuration
SFERA ROBUR**

The modules may be installed side by side horizontally or vertically.

The attention to detail during the design ensures perfect alignment of the modules thanks to the flush mounted boxes spacers (supplied with the boxes), and the screws fitted only on the front sections.

■ **FLUSH MOUNTED INSTALLATION**
with standard boxes, or with specific steel boxes with tearing protection (Robur only).

■ **TOTAL INSTALLATION COMPATIBILITY WITH THE SFERA CLASSIC RANGE.**
Same box, same sizes, ideal in case of refurbishments.

■ **WALL MOUNTED INSTALLATION**
with specific lowered surface mounted box, with minimum protrusion and in-built rainshield.

SFERA ROBUR

tion

18

SFERA
is innovative
also in terms of
configuration and
maintenance
operations.

Without removing the pushbutton panel from the wall it is possible to: adjust the microphone volume, replace or update the nameplate, configure the device using the software and update the device.

All the operations, with the exception of the configuration performed using physical configurators, are possible without disassembling the module.

SFERA New and SFERA Robur can be configured traditionally, using physical configurators, as far as the basic functions are concerned.

Or the specific **TISFERADESIGN** configurator may also be used which offers extreme flexibility in:

- Guiding the installer in the selection and combination of the modules
- Configuring and customising advanced functions
- Producing and printing the nameplates

SFERA^{NEW}

1 Remove the two socket screws

2 Open the door

3 Loosen the clips and slip off the front plate

4 Access PC configuration and adjustment

SFERA^{ROBUR}

1 Remove the 4 screws using the appropriate tool

2 Remove the surround plate

3 Loosen the clips and slip off the front plate

4 Access PC configuration and adjustment

SUPPORT SERVICE BEFORE SALE

For the preparation of estimates of 2 WIRE audio and video door entry systems, BTicino supports the professionals of the sector with dedicated estimate and design tools:

FREE ESTIMATE SERVICE

- Detailed list of items required
- System block diagram and multi-wire connection diagram for the individual devices
- Configuration of all the system devices
- Current absorption checks

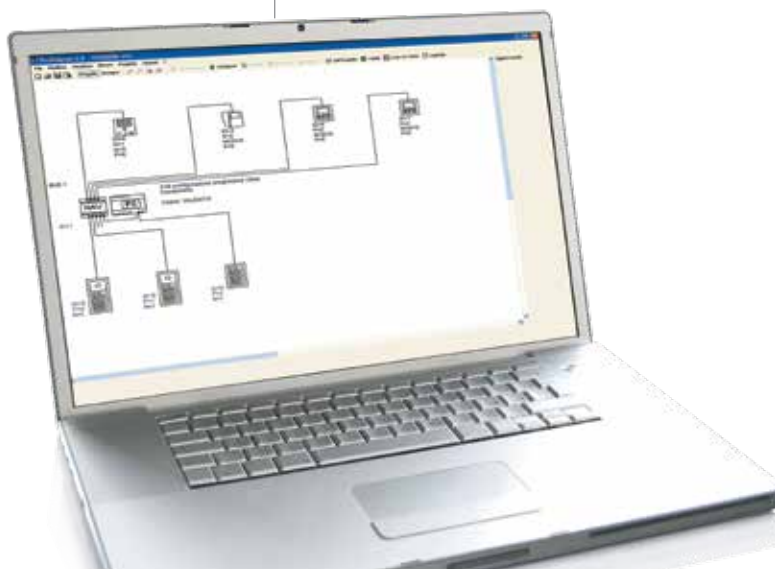

YOU DIAGRAM SOFTWARE

Utility for the design and configuration of 2 WIRE audio and video door entry systems.

You Diagram is the **BTicino** software for designing 2-wire one-family and multi-family video door entry systems. It can be used for producing the system diagram, selecting / addressing entrance panels and cameras, for the configuration of

the devices, and to check the absorption levels on the system BUS. In just a few seconds it is possible to design audio and video door entry systems with optional services, using the product solutions most suited to the requirements.

Contact technical support for enquiries about and access to software 1300 369 777

SFERA NEW - SFERA ROBUR

ELECTRONIC MODULES CATALOGUE

351000

BASIC speaker module for the creation of 2 WIRE audio systems.

Fitted with loudspeaker and microphone volume adjustment. It manages up to 100 pushbutton calls using additional double row pushbutton modules. It can be used for opening an electric door lock directly connected to the S+ and S- clamps (18 V 4 A impulsive - 250 mA holding current 30 Ohm max) and the connection to a local door lock release pushbutton on the PL clamps. To be completed with surround plate. The device must be physically configured.

351100

Speaker module for the creation of 2 WIRE audio & video systems.

Fitted with loudspeaker and microphone volume adjustment. It can manage up to 100 pushbutton calls when using additional double row pushbutton modules. It can be used for opening an electric door lock directly connected to the S+ and S- clamps (18 V 4 A impulsive - 250 mA holding current 30 Ohm max) and the connection to a local door lock release pushbutton on the PL clamps. Preset for additional power supply. Fitted with front LEDs for the notification of the operating status: door lock release, communication active, call put through, and system busy. Integrated optic sensor for the switching on of the night backlighting. To be completed with surround plate. The device can be configured either physically or using the PC and the TiSferaDesign software.

351200

Audio video module for the installation of 2 WIRE colour video systems.

With Colour camera with 1/3" sensor and white LEDs for the lighting of the shooting field. Mist prevention heating resistance. Loudspeaker and microphone volume adjustments. It can manage up to 98 pushbutton calls using the additional double row pushbutton modules. Horizontal and vertical camera position adjustment, +/- 10° in both directions. It offers the possibility of opening an electric door lock directly connected to clamps S+ and S- (18 V 4 A impulsive - 250 mA holding current 30 Ohm max) and of connecting a local door lock release pushbutton on clamps PL. Preset for additional power supply. Fitted with front LEDs for the notification of the operating status: door lock release, communication active, call put through, and system busy. Integrated optic sensor for the switching on of the night backlighting. To be completed with surround plate. The device must be configured physically or using a PC and the TiSferaDesign software.

351300

Wide angle audio/video module for the installation of 2 WIRE colour video systems.

With Colour camera with 1/3" sensor and white LEDs for the lighting of the shooting field. Mist prevention heating resistance. Loudspeaker and microphone volume adjustments. It can manage up to 98 pushbutton calls using the additional double row pushbutton modules. It offers the possibility of opening an electric door lock directly connected to clamps S+ and S- (18 V 4 A impulsive - 250 mA holding current 30 Ohm max) and of connecting a local door lock release pushbutton on clamps PL. Preset for additional power supply. Fitted with front LEDs for the notification of the operating status: door lock release, communication active, call put through, and system busy. Integrated optic sensor for the switching on of the night backlighting. To be completed with surround plate. The device must be configured physically or using a PC and the TiSferaDesign software.

352000

Additional 4-pushbutton modules arranged on single column.

To be used with speaker modules 351000 - 351100 and audio/video modules 351200 - 351300. Connection using the appropriate multicable supplied. Backlighting of nameplates controlled by the speaker module or the audio/video module connected. To be completed with surround plate.

352100

Additional 8-pushbutton modules arranged on double column.

To be used with speaker modules 351000 - 351100 and audio/video modules 351200 - 351300. Connection using the appropriate multicable supplied. Backlighting of nameplates controlled by the speaker module or the audio/video module connected. To be completed with surround plate.

352200

Nameplate module normally used for displaying the house number or other notifications (eg. Legend for calls using digital pushbutton panels, opening/closing times, etc.). Connection using the appropriate multicable supplied. Night backlighting controlled by the speaker module or the audio/video module connected. To be completed with surround plate.

352400

Night & Day and wide angle camera module for the installation of colour video systems. Fitted with 1/3" sensor with N&D function and automatic removal of the IR filter. IR LED for the lighting of the field of view. Mist prevention heating resistance. Automatic brightness adjustment. Connection to the speaker module [351100] using the multicable supplied. To be completed with surround plate.

352500

Graphic display module to be used with speaker module 351100 or with audio/video modules 351200 - 351300 (connection using the multicable supplied). It can operate in two modes: call from address book, or digital call. The call from the address book gives the possibility of sending the call by scrolling on the display the names associated to the residents. It is possible to store up to 4000 residents names. Using the keypad module item 353000 it is also possible to directly call the apartment by entering the number corresponding to the resident. The digital call is also performed using the keypad module item 353000 by entering the numerical code. It is recommended that one or more nameplate modules, item 352200, are installed at the side of the pushbutton panel to display the correspondence between the numerical codes and the names of the users. It is possible to program the names in the address book in two different ways: manual inclusion using the pushbuttons of the display module or inclusion using a PC with the TiSferaDesign software installed, by downloading the file to the display module (RECOMMENDED). System power supply cuts do NOT cause the loss of memory data. To be completed with surround plate.

352700

Inductive loop and control speech synthesis module to be used with the 351100 speaker module or with audio/video modules 351200 - 351300. Enable use by people wearing hearing aids (fitted with T selector) or blind people thanks to the connection status voice message synthesis (call active, call ended, no answer, busy, door open). It is connected to the speaker module using the appropriate multicable supplied. To be completed with surround plate. The device can be configured either physically or using the PC and the TiSferaDesign software.

353000

Keypad module for door lock release, or for the digital call of the apartment (to be used with the display module). It is fitted with relay with contacts (C - NC - NO) and clamps (CP- P1 - P2) for the connection of a local door lock release pushbutton. The numerical code for the opening of the door lock can be programmed using the keypad itself, or using a PC after downloading the module programming file. It also has a programming reset pushbutton and LEDS for the visual notification of the access status. Night backlighting with LEDS. To be completed with surround plate. It is connected to the other modules using the appropriate multicable supplied. The device may also be used as a stand alone unit with independent power supply and operation for door lock. Configuration performed using physical configurators, or a PC with the TiSferaDesign software installed.

353200

RFID badge reader module for the release of the door lock by swiping the badge. It manages up to 20000 badges. It's fitted with relay contacts (C - NO - NC) and clamps (CP - P1 - P2) for the connection of a local door release pushbutton. The badge for the release of the door lock can be programmed from the module itself, or using a PC after downloading the module programming file. It also has a programming reset pushbutton and LEDS for the visual notification of the access status. Night backlighting a LEDS. To be completed with surround plate. It is connected to the other modules using the appropriate multicable supplied. The device may also be used as a stand alone unit with independent power supply and operation. Configuration performed using physical configurators, or a PC with the TiSferaDesign software installed.

353300

Fingerprint reader module for the release of the door lock. It's fitted with relay contacts (C - NO - NC) and clamps (CP - P1 - P2) for the connection of a local door release pushbutton. It also has a programming reset pushbutton and LEDS for the visual notification of the access status. To be completed with surround plate. It is connected to the other modules using the appropriate multicable supplied. The device may also be used as a stand alone unit with independent power supply and operation. Configuration performed using physical configurators, or a PC with the TiSferaDesign software installed.

2 WIRE SYSTEM

General features

■ YOUR JOB IS EASIER

The 2-WIRE system is easy to use. Thanks to the polarity insensitive 2-wire wiring used in each part of the system, connection is simple, quick, and error-proof. There will be no more mistakes, and therefore no need to waste time in subsequent adjustments.

■ HIGH PERFORMANCES

Thanks to the 2-WIRE technology, it is possible to install with the same ease any type of systems, from those in single villas, to those for whole groups of apartment blocks. Also, thanks to the possibility of using the existing cables, it represents the ideal solution when refurbishment existing systems.

THE SYSTEM MAY INCLUDE:

3900 Apartments

3900 Apartment video entrance panels

15 Handsets per apartment

39 Risers with independent sound mode

96 Video entrance panels

Entrance panel

Farthest handset

600 metres

The villa

The apartment

The group of apartment blocks

The group of houses

■ MAXIMUM VERSATILITY

The 2-WIRE system has been conceived to ensure a high level of versatility, to meet the needs of each and every customer.

The 2-WIRE technology enables installing a door entry system

already preset for future conversion into a video system, and is ideal when a mixed audio/video system is required, to meet the needs of individual residents. The system also offers a wide range of entrance panels and

handsets, to meet all the needs of the customer: from the basic door entry system functions, to the more advanced ones, to the integration with MY HOME home automation applications, or look integration with BTicino residential series.

■ INTEGRATION WITH IP TECHNOLOGY

IP and 2-WIRE technologies may be integrated, for the realisation of large projects. Thanks to the dedicated LAN network, IP technology offers

high system performances: long distances, multichannel operation, switchboard software and centralised alarm notification.

Components of the range

EXCLUSIVITY AND LUXURY

AXOLUTE OUTDOOR

The luxury and refinement of AXOLUTE outside the building. It's the ideal solution for large prestigious complexes.

PERFECT
INTEGRATION WITH
RESIDENTIAL LINES

VANDAL RESISTANT

SFERA VANDAL-RESISTANT

It's the entrance panel with a rigorous shape, emphasized by the vandal-resistant stainless steel front cover. Equipped with digital call, it's ideal for large groups of apartment blocks.

VILLA SOLUTION

LINEA 2000 METAL

Elegant and strong, enhanced by the zamak finish, it's the ideal solution for the villa.

LINEA 2000

The basic solution in a smaller size, for one-family or two-family homes.

PERFECT INTEGRATION WITH RESIDENTIAL LINES

VIDEO STATION

The wall mounted handsfree solution Nighter & Whice features an exclusive and elegant design, where glass is the main element.

TECHNOLOGY AND COMFORT

POLYX RANGE

Handsfree range with a modern and minimalist design, well suited to every style of home: the range extends from the basic audio and video versions to the advanced version, which offers the management of video door entry system memory and of the MY HOME functions. Polyx is the first video door entry system range designed following the “for all” design criteria: multi-sensor notifications and accurate ergonomic design are the distinguishing traits of Polyx.

TRADITIONAL

PIVOT AND SWING

The traditional range with a receiver for every installation requirement: wall mounted, flush mounted, and table-top versions.
